

# How to pack energy storage containers

## Overview

---

When packing a portable storage container, it's good to pack in tiers. Every item that you stack should be able to hold the item on top of it, so be mindful of the. That's why proper packaging matters! The energy storage sector serves three main players: In 2024, damaged energy storage shipments cost the industry \$2.7B - enough to power 90,000 homes for a year! Proper packing isn't just about boxes and bubble wrap; it's about enabling the clean energy. Packing a storage container sounds straightforward until you realize just how much can go wrong if you skip a few crucial steps. It might seem simple, but a poorly packed container can lead to damaged belongings and as much as 30 percent wasted space. But it can be intimidating to figure out how to properly pack everything in there. Don't worry, the experts at U-Box by U-Haul have some handy tips to help you make the most of your portable. Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers.
