

How to replace the back film of photovoltaic panels

WORKING PRINCIPLE

Overview

When cracks damage cells or solder joints, I replace affected sections to restore panel output. This involves: Removing the panel's backsheet carefully. New solar panels often arrive with protective film—but should it stay on?

This comprehensive guide explains the crucial difference between factory shipping films (which must be removed) and aftermarket plastic covers (which have specific valid uses). Learn proper removal techniques, understand. If the film is stubborn or adhesive, use a mild solution of soapy water or isopropyl alcohol applied sparingly to loosen it, followed by a soft cloth to wipe away any remaining adhesive. Always handle the panel with clean hands or gloves to avoid fingerprints or dirt, and ensure the panel is stored. I received a busted glass 200w solar panel yesterday that the Seller is going to replace with new. identify the film type and method of attachment, 3. follow specific steps for a successful process.
