

How to use pulleys to lift photovoltaic panels

ESS

Overview

To lift solar panels onto your roof, you can use a ladder railing system, a pulley system, a lifting bag, or even DIY lifting systems using a pulley. Carrying them up the ladder can also be done with products like the solar panel caddy, and all of these ideas will make this task that much easier.

Remove U Brackets: Loosen the lock nuts and remove the U brackets from the master pulley. **Position the Pulley on Ladder:** Place the master pulley between the top two steps of your ladder, with the pulley side facing the front. Used a pulley system to lift it and move the. The Solmetric Module Lift is designed to help you safely and quickly transport a solar PV module on to a roof. The system uses your existing Werner or Louisville fiberglass extension ladder. Utilizing the right lifting equipment, such as cranes, hoists, or.
