

# Huawei 450 photovoltaic panel size

## Overview

---

The Huawei Smart SUN2000-450W-P2 is a vital component for photovoltaic systems, optimized for panels up to 450W. Compact and efficient, with dimensions of 71 x 138 x 25 mm and weighing 550 g, this device ensures an efficiency of up to 99. The maximum power of PV module at STC shall NOT exceed the “Rated Input DC Power” of the power optimizer. Any power optimizer, which is connected to an operating inverter in a PV string, will be bypassed when it fails. \*2 Power optimizer is bypassed in the string connected to an operating inverter when it fails to work \*3 Power optimizer output 0Vdc when disconnecting . The Smart SUN2000-450W-P2 Huawei Optimizer the novel um that performance and energy ihres solar panel zu maximize, On this Way can the Component that Efficiency positive Systems again clear improve. With the Huawei SUN2000-450W-P you will manage the maximum MPP power point of each solar module to improve the energy performance of the PV system and perform functions such. Professional Installation Critical: The size (75-84 inches) and weight (50+ pounds) of 450W panels, combined with complex electrical requirements and structural considerations, make professional installation essential for safety, warranty compliance, and optimal performance. A 450 watt solar panel often has 72/144 cells and it"s closer to 77 x 39 inches in size.

### HUAWEI Smart PV Optimiser SUN2000 - 450W - P

The Huawei Optimiser suits up to 450Wp panels. It can be installed in both portrait or landscape. The MPP voltage range has a wider range and the maximum DC current is high. Key Features: One ...
