

# Huawei Iraq solar Energy Storage Project

## Overview

---

Huawei's proposal involves the construction of a 100 MW solar power plant in Karbala, with a rapid installation time of 6 months. The event brought together government leaders, industry experts, and partners to discuss Iraq's renewable energy and sustainable development plans. The project is intended to be completed within six months and operational by summer. The 215 kWh Smart String Energy Storage System ensures higher safety, longer lifecycle, and intelligent management. For Iraq's commercial and industrial (C&I) sectors, it provides stable Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K. The Iraqi Ministry of Electricity, headed by Minister Ziyad Ali Fadel, is exploring a potential partnership with Chinese tech giant Huawei to construct a 100 MW solar power plant in Karbala. In a recent meeting with Huawei representatives and ministry officials, Fadel emphasized the ministry's.
