

Is it better to install a photovoltaic panel with a large w number

Overview

Higher wattage panels provide better power output but come with higher costs and larger size, which might not be suitable for everyone. If you prioritize maximum wattage per panel without concern for cost or space, higher wattage panels are ideal for you. I've heard that sometimes the higher wattage panels are simply larger. Luckily, you can get a valuable solar installation with larger or smaller panels and a professional solar company can guide you through that process. Here's how solar panel size plays a role. At Project Solar, we're reevaluating every aspect of the solar sales process to focus on value for customers instead of commission for salespeople. Panels typically come in two standard sizes: 60-cell (smaller, commonly used for residential systems) and 72-cell (larger, often used in commercial settings). But, as widespread as that assumption may be, it isn't true.
