

Kosovo Outdoor Solar Electricity Systems

Overview

Kosovo is transitioning to solar energy with key projects such as the 'Kosovo's 100 MW Solar Auction' in Kramovik, alongside incentives for small-scale photovoltaic (PV) installations up to 7 kW. These efforts aim to amplify solar energy capacity to 100 MW by 2031. It will contribute to significantly reducing greenhouse gas emissions and pave the way for further investment. This expansion will be driven by the introduction of larger-scale ground-mounted solar parks, contributing to the country's goal of achieving 400 MW of solar capacity. Government-controlled Kosovo Energy Corp. It informed the local community that agricultural and other activities weren't allowed anymore on the designated land. On the path to climate neutrality, Kosovo has specific milestones. To support the green transition in Kosovo*, one of its largest solar photovoltaic plants will be constructed on former ash dump fields near Pristina with a capacity of up to 100 MW. 66%) Korporata Energjetike e Kosoves (KEK SH.
