

Kubuqi Photovoltaic Solar Power Generation

Overview

When NASA satellites captured images of China's Kubuqi Desert transitioning from yellow to blue in 2024, the world took notice. 5 (Xinhua) -- Seen from the air, 196,000 solar panels stretch across the Kubuqi Desert in a striking horse-shaped mosaic, while on the ground, visitors to Chaideng Village, Ordos City, stroll along the solar station and nearby farmstays, savouring local delicacies in what was once the. A surge of newly installed solar panels is transforming the Kubuqi Desert in Inner Mongolia. A surge of newly installed solar panels is transforming the Kubuqi Desert in. The Kubuqi Desert was once the source of sandstorms sweeping over the North China, but with the development of clean energy, it is now full of vitality. The establishment of the Junma Solar Power Station helps revitalize the desert so that we can see the beautiful scene of “the sunset and the birds. In the Kubuqi Desert of north China's Inner Mongolia Autonomous Region, CTG's Phase I photovoltaic (PV) power project at its solar and wind power base is advancing power generation and desertification control simultaneously. With 115 billion RMB invested.

Kubuqi Photovoltaic Solar Power Generation

Solar power project transforms desert into energy hub

The Junma solar power station -- "Junma" meaning "fine horse" in Chinese -- is part of an ambitious desert reclamation project known as the "great photovoltaic wall," stretching along the ...

Photovoltaic project powering desert industry

The Kubuqi desert, the seventh largest desert in China, is home to the Kubuqi photovoltaic desertification control project, which stands strong as a beacon of green construction. The project ...

GRADE A BATTERY

LiFePO4 battery will not burn when overcharged, over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.
