

# Laos electricity consumption

## Overview

---

Laos: Electricity consumption, billion kilowatthours: The latest value from 2023 is 12. Historically, the average for Laos from 1980 to 2023 is 2. The. Electricity can be generated in two main ways: by harnessing the heat from burning fuels or nuclear reactions in the form of steam (thermal power) or by capturing the energy of natural forces such as the sun, wind or moving water. Many would argue that it is a crucial for poverty. Laos generates most of its electricity from hydropower. The country has substantial hydro and wind potential but faces deforestation challenges.
