

Latest news on photovoltaic energy storage in Europe and the United States

Overview

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy integration and grid transition to clean power. UK energy storage company Zenobe has decided to enter the German market and is looking to acquire battery energy storage systems (BESS) of no less than 1 GW/4 GWh by 2030. 14 GW of solar capacity for self-consumption in 2025, lifting cumulative capacity to 9. Czechia's. China sets "capacity price" floor for grid-scale storage, tying payments to coal benchmarks Beijing's new rule lets standalone storage earn fixed-cost payments for availability, not energy delivered. WEG secures funding for Brazilian battery manufacturing plant The new plant will increase WEG's. In 2025, Europe's battery storage market entered a new phase of scale and maturity. At. PVTIME - According to a new scenario analysis by McKinsey, persistent tariff increases between the United States, the European Union and China could lead to a 10% reduction in solar and energy storage installations across Europe and America by 2035. Rising costs and supply chain disruptions may. Swiss utility Axpo has signed a five-year wind power purchase agreement (PPA) with Spanish energy trader Fortia Energia to supply renewable electricity to Fortia's industrial customers, the companies said on Thursday.
