

Leading photovoltaic solar power generation

Overview

In this blog, we profile the Top 10 Companies in the Solar Photovoltaic PVs Industry—a combination of established giants, innovative module manufacturers, and integrated energy solution providers shaping the landscape of global solar energy. LONGi Green Energy Technology Co. Solar energy has been used for centuries, initially for lighting fires and heating. In 1883, the creation of the first solar cell was the beginning of this new energy industry, but the silicon photovoltaic (PV) cell was not created until 1954. 5 gigawatts direct current (GW dc) of capacity in Q2 2025, a 24% decline from Q2 2024 and a 28% decrease since Q1 2025. Solar accounted for 56% of all new electricity-generating capacity added to the US grid in the first half of 2025, with a total of 18 GW. The Global Solar Photovoltaic (PV) Market was valued at USD 219.6 Billion by 2030, growing at a Compound Annual Growth Rate (CAGR) of 11.4% during the forecast period (2024–2030). This robust growth is fueled by aggressive global decarbonization. With countries installing panels faster than TikTok challenges go viral, the 2025 solar power generation ranking reveals fascinating shifts in global energy leadership.
