

Lebanon off-grid bess cabinet corrosion resistant

Overview

The external contact surface of the battery module is covered by insulating material (Metal protected against corrosion, the top cover is made of PP, the bottom is made of aluminum). The external contact surface of the battery module is covered by insulating material (Metal protected against corrosion, the top cover is made of PP, the bottom is made of aluminum). Compatible with different battery brands, 150-750Vdc. Optional PV input, Optional backup module. All-in-one design and highly integrated. Global grid certified & listed PCS. NEMA 4X: Adds corrosion resistance, perfect for coastal or industrial environments. Our outdoor telecom cabinets and outdoor telecom enclosures are designed to house and protect telecommunications equipment in remote or exposed locations. Features include robust construction, thermal management. With its scalable and anti-corrosion capabilities, AZE's battery system can meet project requirements of varying scale and is suitable for various environmental conditions, making it an ideal solution for grid ancillary services and C&I applications while ensuring reliability and safety. Designed for optimal performance, safety, and scalability, they ensure seamless integration with BESS. This product integrates a power conversion system (PCS), batteries, a battery management system (BMS), thermal management, power distribution, and fire protection, adopts single-serial design, and enables zero damage of parallel connection. Integrated battery management system and thermal.
