

# Lightning-protected lithium battery energy storage cabinet for mountainous areas

## Overview

---

This energy storage system is ideal for remote areas such as mountains, islands, border outposts, and other off-grid or weak-grid locations. When integrated with solar PV, it can reliably power telecom stations, weather monitoring units, rural clinics, and other. The Vertiv™ EnergyCore Li5 and Li7 battery systems deliver high-density, lithium-ion energy storage designed for modern data centers. Purpose-built for critical backup and AI compute loads, they provide 10–15 years of reliable performance in a smaller footprint than VRLA batteries. These outdoor battery enclosures, which come in all shapes and sizes, are designed to withstand extreme elements, climates and environments. Stationary power storage systems have experienced strong growth in recent years. It has the characteristics of high energy density, high charging and discharging power. Discover NPP's Outdoor Integrated Energy Storage System, a cutting-edge solution that seamlessly combines lithium iron phosphate batteries, advanced Battery Management System (BMS), Power Conversion System (PCS), Energy Management System (EMS), HVAC technology, Fire Fighting System (FFS).
