

List of home automation products

Overview

This guide walks you through 15 systems, starting with the five above and stretching to luxury installs such as Control4 and Savant, plus security-first options like Ring and ADT. To cut through the noise, we spent six months living with every major ecosystem and crowned these standouts: Home Assistant (power-user favorite), Samsung SmartThings Station (best mainstream all-rounder), Apple HomeKit (privacy leaders), Amazon Alexa (voice-centric convenience), and Google Home. We've tested hundreds of smart home products in more than 20 categories to help determine which ones are best for every room in (and out of) the house. These days, there's a smart version of pretty much every home device you can think of. These products (usually) connect to the internet, so you can. The top home automation systems consolidate all your smart home devices into a single hub, providing an intuitive interface that combines smart home convenience to make your life easier. We're not living the Jetsons' life yet, but I'm a firm believer that we're headed that way. Keep your home safe with intelligent locks and security systems, and improve energy efficiency with smart light bulbs and thermostats. **How Do Smart Homes Work?**

A smart home or building uses connected devices together via the internet connection to allow for remote control and managing appliances and systems.
