

# Lithium battery pack price and weight

## Overview

---

BloombergNEF's 2025 survey finds average lithium-ion pack prices dropped 8% to \$108/kWh, driven by LFP adoption, overcapacity, and competition. Stationary storage costs plunged 45%, EV packs averaged \$99/kWh, with China leading lowest prices. New York - Decem- According to. Check each product page for other buying options. 115/Wh globally in 2024 (down ~20% YoY), but finished consumer systems (portable power stations) retail much higher due to inverters, BMS, certifications, and margins. This represents the steepest decline among all lithium-ion battery use cases and makes stationary storage the cheapest category for the first time. These battery packs are light-weight, eco-friendly, provide long battery life, and are fully PCB protected.
