

Longyangxia Photovoltaic Power Generation and Energy Storage

Overview

Longyangxia Phase II Solar PV Park is a ground-mounted solar project which is spread over an area of 27 km². The project generates 220GWh electricity and supplies enough clean energy to power 200,000 households. Longyangxia Gorge, located in Gonghe County in northeastern Qinghai Province, narrows to just 30 meters at its mouth while stretching 33 kilometers in length. In 1976, local authorities picked this site for the construction of the Longyangxia Hydropower Station. The complex merges solar technology with hydroelectric power from the adjacent. tovoltaic power stations in the world. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active. It has been developed in a single phase.

Longyangxia Photovoltaic Power Generation and Energy Storage

Power plant profile: Longyangxia Phase II Solar PV Park, China

Longyangxia Phase II Solar PV Park is a ground-mounted solar project which is spread over an area of 27 km². The project generates 220GWh electricity and supplies enough clean energy to power ...
