

# Luxembourg energy storage power planning

## Overview

---

The Luxembourg community, operating as a key node within the EnerTEF project, combines solar PV installations with wind parks, battery storage systems, and electric vehicle (EV) chargers. The transition to a decentralized, renewable-powered future is taking a significant step forward in Luxembourg. A local energy community, as part of the broader European EnerTEF project, is pioneering an integrated approach to energy management by combining photovoltaic (PV) systems with a suite of. With a 20-point roadmap to scale electricity storage, the Grand Duchy is opening doors for innovation in grid flexibility, home energy systems, and smart infrastructure. The strategy, announced on 9 July, aims to maximise the added value of storage batteries for end consumers and the electricity. Why a dedicated strategy for battery storage?

Thank you! THANK YOU! value. On Wednesday 9 July 2025, Luxembourg's Minister of the Economy, SMEs, Energy and Tourism, Lex Delles, presented the strategic roadmap for the promotion and development of electricity storage batteries in Luxembourg: "Späicherstrategie Lëtzebuerg". Energy storage provides a more reliable power supply and energy savings benefits for the system, which provides a useful exploration for large-scale marketi still relatively slow now, the 14t EU has adopted a EUR1.
