

# Malawi backup power

## Overview

---

Malawi constructing first battery-energy storage system to enhance grid resilience against cyclone-related outages. Malawi's mining sector is facing a serious productivity crisis due to persistent electricity shortages, with government warning that continued power instability could stall industrial growth and undermine economic recovery. Minister of Energy and Mining, Dr. 20-megawatt project backed by Global Energy Alliance for People and Planet and Malawian government, aiming to provide backup power during grid disruptions. Electricity generation accounts for 3% of the country's total energy consumption, of which 72% is hydropower, 18. With over 60% of its 586MW installed capacity reliant on hydropower, Malawi's grid is highly vulnerable to cyclones like Idai. Of Malawi's 20 million people, fewer than 2.5 million have access to grid electricity. This tempts families, industry, small businesses, hospitals, and others to install and use backup diesel generators. Malawi's. Malawi is one of the most energy-poor countries on the planet, with less than 20 percent of the population having access to a reliable source of electricity, and access remaining below 10 percent in rural areas.

**12.BV6Ah**

Nominal voltage (V):12.8  
 Nominal capacity (Ah):6  
 Rated energy (WH):76.8  
 Maximum charging voltage (V):14.6  
 Maximum charging current (A):6  
 Floating charge voltage (V):13.6~13.8  
 Maximum continuous discharge current (A):10  
 Maximum peak discharge current @10 seconds (A):20  
 Maximum load power (W):100  
 Discharge cut-off voltage (V):10.8  
 Charging temperature (°C):0~+50  
 Discharge temperature (°C):-20~+60  
 Working humidity: <95% R.H (non condensing)  
 Number of cycles (25 °C, 0.5C, 100%DoD): >2000  
 Cell combination mode: 32700-4s1p  
 Terminal specification: T2 (6.3mm)  
 Protection grade: IP65  
 Overall dimension (mm):50\*70\*107mm  
 Reference weight (kg):0.7  
 Certification: un38.3/msds

## Expanding energy generation and storage in Malawi

As the first utility-scale plant in the region to use a battery storage system, the project generates energy to the national grid for use by homes and businesses. Its capacity to store up to 10MW of energy is ...
