

Malta environmental sustainability

Overview

The Malta country profile provides a concise overview of key trends across three dimensions: environment and climate; socio-economic change; and system change (energy, mobility and food) in the country. This Ministry leads Malta's commitment to a sustainable, climate-neutral future, for a better quality of life. It highlights the main developments and challenges in these areas, including measures to support. Malta's Sustainable Development Strategy for 2050 is an ambitious document that translates Malta's Sustainable Development Vision for 2050 into a strategic policy direction for the environmental protection and socio-economic development of the Maltese Islands. It follows the direction set by the. Malta has continuously shown that commitment and goal clarity, rather than size, are what determine leadership in the global sustainability conversation, despite its small size and limited resources. In 2023, the country accounted for around 0.1 % of the EU's net greenhouse gas (GHG) emissions, and achieved a net emissions reduction of 20.7 % compared with 2005 (see trajectory in Figure 1).
