

Malta s commercial and industrial energy storage system

Overview

Malta's grid-scale, long-duration energy storage system helps governments, utilities, and grid operators transition to low-cost, carbon free renewable energy while enhancing energy security. Using proven subsystems, a locally sourced supply chain, and abundantly available materials like salt, the system delivers economical, clean energy with a flexible power and heat. SAM opportunity assumes \$350mm total revenue per 100 MW LDES system. Operates at utility-scale - no other LDES technology can replicate what Malta can do, and where it can go, in this space. Malta's Steam Rankine (SR) Pumped Heat Energy Storage (PHES) solution has a unique set. CAMBRIDGE, Mass., a leader in long-duration energy storage, today announced that it has closed on a round of financing provided by a group of investors including Siemens Energy Ventures and Alfa Laval as well as existing shareholders Breakthrough Energy Ventures. Malta's innovative long-duration energy storage technology stores electricity as thermal energy from eight hours to eight days or longer, later returning it to the grid to meet hourly, daily, and weekly needs.

Malta s commercial and industrial energy storage system

BBVA supports Malta Inc.'s long-duration thermal energy storage tech

It will be based on a technology that Malta Inc. claims can enable cost-effective energy storage for applications requiring anything from 8-hour to 200-hour (or about eight-day) durations.
