

Market Price of 15MWh Photovoltaic Energy Storage Unit

Overview

As of 2025, prices range from \$0.86 per watt-hour (Wh) for utility-scale projects, while residential systems hover around \$1,000–\$1,500 per kWh [4] [6] [9]. But wait—why the wild variation?

Let's dive deeper. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. NLR's PV cost benchmarking work uses a bottom-up. Each year, the U. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. The Base Year estimates rely on modeled capital expenditures (CAPEX) and operation and maintenance (O&M) cost estimates benchmarked with industry and historical data. 5 billion in 2034, at a CAGR of 17.
