

# Microgrid comprehensive evaluation method

## Overview

---

This paper combines the subjective evaluation method with the objective evaluation method, and proposes a comprehensive evaluation method of AC/DC hybrid microgrid planning based on analytic hierarchy process and the entropy weight method. In this method, the objective weight of power quality indicators in single node is determined by using the intensity of conflict and contrast firstly. Secondly, the multi-scale adaptive phase number selection.

## Microgrid comprehensive evaluation method

---

### Evaluation and benchmarking of research-based microgrid systems ...

The novelty of this case study lies in its unique approach to rank research-based microgrids, offering significant benefits to authorities by initiating a method to test microgrids and ...
