

# Middle East strontium demand for solar power generation

## Overview

---

The report provides a strategic analysis of the strontium market in the Middle East and describes the main market participants, growth and demand drivers, challenges, and all other factors, influencing the development of the market. The Middle East Solar Industry Association's (MESIA) latest Solar Outlook Report offers a comprehensive overview of the solar energy landscape in the Middle East and North Africa (MENA) region. While the report acknowledges rapid growth in solar deployment, it also highlights significant challenges. Grid connected solar PV capacity in the Middle East is expected to grow at a CAGR of 12.9% by 2030, one of the highest globally. Solar PV is expected to contribute over half of the Middle East's power supply by 2050, driven by increasing power demand and. The Middle East and North Africa saw 2019 again confirm the growth and importance of commissioning large projects and launching additional phases of their renewable energy and solar programs (Morocco, Egypt and the UAE) and other countries of the region are coming on board. Projects in the pipeline. By the end of the year, renewables could be displacing more than 150,000 b/d of oil from Saudi Arabia's power sector The Middle East set new records for energy demand and emissions in 2024, according to the Energy Institute's Statistical Review of World Energy, co-authored by KPMG and Kearney.

## Middle East strontium demand for solar power generation

### The Middle East Is Bracing for a Solar Energy Boom

Several Middle Eastern countries are investing heavily in solar power projects, aiming to significantly increase the share of renewable energy in their power generation mix.
