

Multi-directional wind gathering breeze generator set

Multi-directional wind gathering breeze generator set

SG11202102148VA

F03D3/04 Wind motors with rotation axis substantially perpendicular to the air flow entering the rotor having stationary wind-guiding means, e.g. with shrouds or channels

Ryse Energy Air Breeze 24 Volt DC Turbine , NAZ Solar Electric

The AIR Breeze will produce 40 kWh per month with an average wind speed of 13 miles per hour and requires a start up wind speed of 7 mph. It comes with a built-in microprocessor controlled charge controller and the ...

A novel triboelectric generator based on wind-induced film vibration

This study successfully developed a wind-induced film vibration triboelectric generator to harvest the wasted wind energy in urban. Integrating the stackable dual-blade structure into TENG facilitates the ...

Multi-Application Scenario Breeze Generator Silent Generator

Compact and Efficient: Our micro wind generator is designed to be compact yet highly efficient, making the most of even gentle breezes. Silent Operation: Enjoy the benefits of renewable energy without the noise. Our ...

Wind Turbine Generators by AIR Breeze

Now this trusted small wind generator has gotten even better, thanks to a fully re-engineered design optimized for the cruising environment. Quieter, more efficient, and precision engineered to deliver more energy at lower ...

Direction-adaptive triboelectric- electromagnetic hybrid nanogenerator

Addressing the irregular and low-frequency characteristics of gusts, a bladeless wind turbine triboelectric nanogenerator (BWT-TENG) with enhanced aerodynamic performance is proposed, enabling

CN102146877A

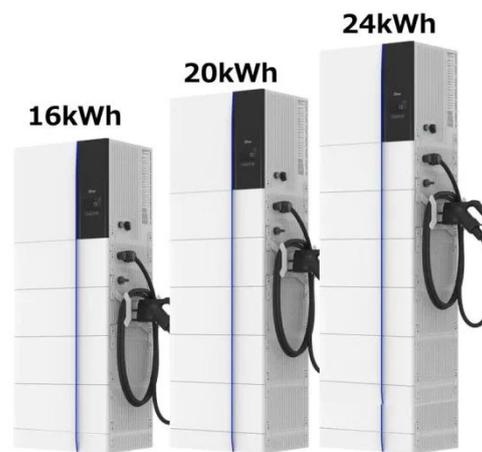

The invention relates to a construction-type combined wind-gathering wind power generator set.

Breeze Generators

China Breeze Generators catalog of Wind Turbine Generator Breeze Start Silent Operation Tulip Windmill Generator, Factory Direct Apply Full Scene Wind Turbine Air Breeze Generator provided by China ...

[Get Price](#)

4-Winds Turbine Generator

The positioning of the vanes capture wind regardless of the direction it is blowing. The invention could be made in all sizes from a micro unit for behind the

grill of an electric car, to small single home units, to large units ...

[Get Price](#)

Direction-adaptive triboelectric-electromagnetic hybrid nanogenerator

A direction-adaptive triboelectric-electromagnetic hybrid generator is proposed for capturing omnidirectional breeze wind energy. A sandwiched arched TENG unit with contact-sliding-separation mode ...
