

Netherlands battery electric vehicles bevs

Overview

In 2025 the Netherlands registered 156,139 new battery electric passenger cars (BEVs) in 2025. This represents an increase of 18. Plug-in hybrid electric vehicles (PHEVs) also grew, reaching 34,137 registrations in 2025 versus. The Netherlands remains one of Europe's leading markets for electric vehicles (EVs), with high penetration of battery electric vehicles (BEVs) and continued growth in plug-in hybrid electric vehicles (PHEVs). According to RAI Vereniging and BOVAG, 13,968 new BEVs were registered in the Netherlands, compared with 10,965 in October 2024. This represents an impressive year on year increase of 27 percent. Examining the relative market share growth of newly sold BEVs between 2018 and 2024, we observe a diversification in growth paths among European countries. Compared to the 2018–2022 period, new data for 2023–2024 shows both consolidation in mature markets and strong acceleration in emerging ones. According to full-year data from JATO.
