

New Energy Storage Market Prospects

Overview

After a historic 2025, when global BESS capacity surpassed 250 GW and overtook pumped hydropower, momentum is set to accelerate in 2026. Key markets are expanding, emerging regions are stepping into the spotlight, and battery storage is increasingly replacing gas generation. Since 2024, gigawatt-hour projects have been commissioned or started construction in not only the US and China, but also Saudi Arabia, South Africa, Australia, Netherlands, Chile, Canada and the UK. BloombergNEF expects additions to grow 35% this year, setting a record for annual additions, at 94. The Energy Storage Market Report is Segmented by Technology (Batteries, Pumped-Storage Hydroelectricity, Thermal Energy Storage, Compressed Air Energy Storage, Liquid Air/Cryogenic Storage, Flywheel Energy Storage, and More), Connectivity (On-Grid and Off-Grid), Application (Grid-Scale Utility. Factors driving the decline include cell manufacturing overcapacity, economies of scale, low metal and component prices, adoption of lower-cost lithium-iron-phosphate (LFP) batteries, and a slowdown in electric vehicle sales growth. According to BNEF, battery pack prices for stationary storage fell. Our Annual Global Energy Storage market report adds to our continued series of key energy transition focused industry reports. news about the role of transmission system operators (TSO) in the industry. System integrator Fluence saw revenue of US\$475.

New Energy Storage Market Prospects

Energy-Storage.News

A framework for the "development, utilisation and commercialisation of energy storage systems" in the Philippines has been passed by the House of Representatives.
