

# New South Wales Solar Farm

- ☑ High energy density and long cycle life
- ☑ Modular structure

- No need to replace the battery
- Shorter charging time
- Meets 99% EV car

## Overview

---

NSW is a leader in the development of large-scale solar projects. A 90 MW solar farm and 360 MWh battery storage project proposed for northern New South Wales has secured planning approval as the state government continues to transition the electricity sector from coal and gas-fired power to renewable energy. The 90-megawatt Summerville solar farm will be located on a 244-hectare site in Rappville in the Richmond Valley, 60 kilometres south west of. ACE Power and Osaka Gas Energy Australia have joined forces to develop the 141MWdc Forbes Solar Farm, which is proposed for central New South Wales in Australia. It has about 872,000 solar panels on 770 hectares, and an installed capacity of 314 MWac.
