

# **New energy battery cabinet testing project**

## Overview

---

Can your battery cabinets withstand real-world operational stresses while maintaining optimal efficiency?

As global energy storage capacity surges past 1,500 GWh in 2024, performance testing has emerged as the linchpin preventing catastrophic failures. Their vision was to retrofit standard lab incubators into fully integrated custom test chambers—capable of supporting their unique. Southern Research and Acelerex are ready to be engaged to provide testing and commissioning services to support these efforts. We provide pre-procurement test plans as well as provide onsite or remote testing for BESS projects for performance qualifications to use cases, commissioning and warranty. Sanwood provides a comprehensive portfolio of specialized environmental test chambers designed to validate every aspect of new energy battery reliability under the most demanding real-world and accelerated stress conditions. Imagine this scenario: A 50MW air-compressed energy storage facility in Texas had to shut down last month when its cabinet cooling systems failed during a.
