

New energy storage base

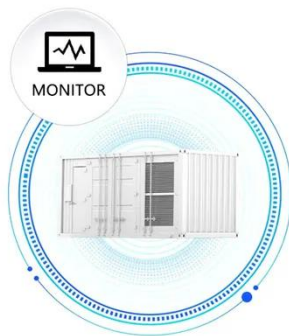

Overview

China has officially announced the procurement of sodium-ion batteries, setting a price ceiling at \$150/kWh. This exciting development comes alongside the construction of a groundbreaking energy storage project in the suburban district of Fengxian, south of Shanghai. The growing attractiveness of battery energy storage is driving a transformation fueled by record-setting installations nationwide. The Megapack, which is an advanced battery system designed for large-scale energy projects, can store more than 3,900. 2025 was a record-breaking year for the energy storage market globally. China, for instance, removed the mandate to install storage with new. Through the Big Data & Artificial Intelligence (AI)-powered StartUs Insights Discovery Platform, covering over 9M+ startups, 20K+ technology trends, plus 150M+ patents, news articles & market reports, we identified top battery storage startups.
