

# Nicaragua Solar System Charging Project

## Overview

---

Funded by an \$83 million investment from Beijing, the Enesolar-3 photovoltaic facility in Nindirí, Masaya, is set to supply renewable energy to the country's water utility, ENACAL, directly benefiting nearly 4 million people across urban and rural communities. Nicaraguan President Daniel Ortega is advancing the country's renewable energy initiatives with the approval of a significant solar power project. Developed in collaboration with China Communications Construction Company (CCCC), the El Photovoltaic Plant will produce 67.35 MW, marking a major step. Nicaragua, with Chinese financing, launches its largest solar plant to date—powering water systems, cutting energy costs, and deepening South-South cooperation on infrastructure for social good. That's exactly what the Managua Photovoltaic Energy Storage Charging Station brings to Nicaragua's capital. As solar adoption grows 18% annually across Latin America (see Table). In 2020, GRID Alternatives and an all-women cohort of local trainees from Nicaragua installed a solar system on a community school in the remote community of El Paraíso in Nicaragua.

## Nicaragua Solar System Charging Project

### China and Nicaragua agree to execute solar energy project

Nicaragua and the China Communication and Construction Corporation (CCCC) celebrated a historic agreement, after signing two key documents for the El Hato solar project, which ...

**Product Model**  
 HJ-ESS-215A(100KW/215KWh)  
 HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
 1600\*1280\*2200mm  
 1600\*1200\*2000mm

**Rated Battery Capacity**  
 215KWH/115KWH

**Battery Cooling Method**  
 Air Cooled/Liquid Cooled

### Managua Photovoltaic Energy Storage Charging Station: Powering

The Managua Photovoltaic Energy Storage Charging Station demonstrates how solar innovation can meet real-world energy demands. By combining storage technology with smart design, it addresses ...
