

# Off-grid price of photovoltaic containerized systems for airports

## Overview

---

Each system, including 5 kW panels, a 10 kWh lithium battery bank, and real-time remote monitoring, cost around USD \$25,000, including shipping and installation. Let's talk about actual prices. Here are standard ballpark estimates (in USD):. This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations. Solar panel prices have dropped 82% since 2010, while lithium-ion battery costs decreased 89% over the same period. This enables 20-foot containerized systems. Each system integrates solar PV, battery storage, and optional backup generation in a modular, pre-engineered platform that is scalable for projects ranging from 5kW to 5MW+.
