

# Off-grid solar energy storage cabinet for urban lighting

## Overview

---

Featuring an IP55/IP65-rated enclosure, it offers excellent resistance to water, dust, and corrosion, making it ideal for solar energy, wind-solar hybrid, off-grid, and industrial backup power systems. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. This place is called a "battery enclosure", or what is. AZE's all-in-one IP55 outdoor battery cabinet system with DC48V/1500W air conditioner is a compact and flexible ESS based on the characteristics of small C&I loads. Whether your project involves off-grid energy storage, telecom backup stations, or smart grid. ECE One-stop outdoor solar battery storage cabinet is a beautifully designed turnkey solution for energy storage system.
