

Off-grid solar energy storage cabinet hybrid type discount for oil platforms

Overview

At JCE, we've observed that electrification through offshore solar and hybrid power systems not only cuts down on fuel costs but also simplifies logistics by removing the need for on-site fuel storage. In response, MEOX Off-Grid Container Power Systems has emerged as a modular, rapidly deployable solution (4-hour setup) that integrates solar, storage, and diesel backup for reliable energy independence. Our hybrid systems leverage core technologies like DC-coupled architecture (system efficiency). AZE's all-in-one IP55 outdoor battery cabinet system with DC48V/1500W air conditioner is a compact and flexible ESS based on the characteristics of small C&I loads. The commercial and industrial (C & I) system integrates core parts such as the battery units, PCS, fire extinguishing system. Foxtheon's HybridPack series redefines hybrid energy solutions by combining the power of diesel, battery, and solar energy into one intelligent hybrid generator system. This transition helps lower the carbon footprint and greenhouse gas emissions, contributing to a cleaner environment. At JCE, we have firsthand experience with such.
