

On accelerating the promotion of new energy storage

Overview

China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems. A key component of that is the development, deployment, and utilization. The main goals of new energy storage development include: Full market development by 2030. 1GWh in 2023, nearly three times the new installed capacity of 7. With demand for energy storage soaring, what's next for batteries—and how can businesses, policymakers, and investors.
