

Outdoor power supply export standards to Europe and the United States

Overview

This article comprehensively analyzes the certification requirements for portable energy storage power supplies in major global markets, providing a systematic reference guide for manufacturers. External Power Supplies (EPS) are devices used to supply electricity to, and to charge built-in batteries of electronic and electric devices such as laptops, mobile phones, tablets, MP3 players, electronic cigarettes, electric tooth brushes, electric shavers, etc. The California Energy Commission was one of the first regulation agencies to release an EPS standard back in 2004, with mandatory standards for efficiency and no-load power draw, followed by the European Union. Over the years, the US and EU standards went in and out of step with updates, but the Energy Star program.
