

PV module price trends

Overview

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Weekly spot price report for 182mm modules will be based on the 182*182-210mm format from June 2024 onwards due to the slim price gap among varying formats. BC module prices in China will be added. Through detailed survey cross-survey of data from major suppliers and procurement parties, Green Energy Research is able to provide an accurate weekly report on spot prices of key PV components. Green Energy Research can also quickly produce a detailed market analysis for a VIP client, as its staff. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market. The global market for solar photovoltaic (PV) modules has experienced significant fluctuations in pricing over the past few years, influenced by factors such as supply chain disruptions, raw material costs, trade policies, and technological advancements. 28/W, ending years of dramatic fluctuations as supply-demand dynamics rebalance and weak suppliers exit the market. 2 TW dc • China continued to dominate the global market, representing ~60% of 2024 installs, up 52% y/y.
