

Pakistan switches to solar power generation

Overview

There has been a significant shift in Pakistan's energy sector, and solar power is now the country's primary source of energy. 3 percent of Pakistan's total utility electricity was supplied by. Pakistan has witnessed one of the most rapid and unanticipated transitions to clean energy, driven largely by homes and businesses installing rooftop solar panels. Beth Gardiner reports for Yale Environment 360. [2] In 2024, solar power installations in the country grew at a high rate with solar installations providing an estimated one-third of the country's entire generating. ISLAMABAD — Muhammad Zia ur Rahman got the idea to install solar panels on his house after he saw some going up on a mosque in his neighborhood in Islamabad, Pakistan's capital city.
