

Philippines Energy Storage Power Station Investment Project

Overview

The projects, with a combined investment of \$7.5 billion, are designed to provide large-scale energy storage solutions to support the country's transition to a more sustainable power mix. In a strategic move valued at approximately \$21 million, Aboitiz Power is integrating BESS technology into its existing thermal plants, a model for clean energy that is being closely watched by national utilities as a blueprint for climate-resilient infrastructure. The East Asia Utilities Corporation (EAUC) power plant in Cebu, Visayas, Philippines. With goals of 35-percent RE in the generation mix by 2030 and 50 percent by 2040, the Department of Energy (DOE) sees BESS as a. Support CleanTechnica's work through a Substack subscription or on Stripe. The Asian Development Bank (ADB) and the Global Energy Alliance for People and Planet (GEAPP) have joined forces to launch ENABLE.
