

# Photovoltaic Energy Storage Special Report

## Overview

---

EnergySage has released its twentieth semiannual Solar & Storage Marketplace Report, which analyzes millions of transaction-level data points from homeowners shopping on EnergySage.com for solar panels, inverters, and batteries from solar companies in 50 states and Washington, DC. Energy storage has gone from being a peripheral player to a central actor in the renewable energy transition. This was the second consecutive year of record-breaking capacity. Solar accounted for 66% of all new electricity-generating capacity added to the US grid in 2024, as the. Since 2017, EnergySage marketplace data has powered BloombergNEF's U. Residential PV Tracker - an interactive dashboard that provides solar market intelligence and pricing trends to industry experts. Where does EnergySage solar industry data come from?

Activity on the EnergySage Solar Marketplace. For solar-plus-storage—the pairing of solar photovoltaic (PV) and energy storage technologies—NLR researchers study and quantify the economic and grid impacts of distributed and utility-scale systems. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount represents an almost 30% increase from 2024 when 48. Each presentation focuses on global and U.
