

# Photovoltaic aluminum alloy connecting plate

## Overview

---

Engineered for max output, sustainable designs improve efficiency. Standard aluminum fittings facilitate seamless panel deployment. Components are lightweight yet strong and corrosion-resistant. Chalco provides high-quality aluminum products for the solar industry, serving key components like photovoltaic panel frames, reflectors, inverter housings, and heat dissipation parts. Chalco also offers complete integrated mounting systems and structural solutions—including roof and ground mounts. The Aluminum Solar Panel Mounting System is a vital structural component used for securing and installing solar panels, commonly utilized in photovoltaic (PV) projects. Get design support, durable finishes, and a circular material solution.

## Photovoltaic aluminum alloy connecting plate

---

### Aluminum mounting system for photovoltaics and glazing

We offer a system of profiles and connecting elements with a high added value, wherewith can easily and quickly create a framework for the installation of photovoltaic panels. The system is designed ...
