

Photovoltaic bracket briquetting production integrated machine

Overview

This production line integrates uncoiling, leveling, feeding, punching, forming, and cutting into a seamless workflow: Core Equipment: 3-in-1 Feeder + Punching Press + Cold Roll Forming Machine. The Photovoltaic (PV) Bracket Production Line is a fully automated solution designed for the mass production of solar mounting structures (solar struts/channels). Comprising a 3-in-1 Decoiler Straightener Feeder, a Stamping Press, and a Cold Roll Forming Machine, this line adopts a “Pre-Punching. Zhongtuo's automatic open-close type solar panel bracket machine is setting a new benchmark in the manufacturing of solar mounting structures, combining efficiency, flexibility, and automation like never before. The Zhongtuo solar panel bracket machine is more than just a piece of equipment—it is a. MASSCA's solar mounting strut channel manufacturing system is a high-performance production solution engineered to fabricate strut channels for solar support structures in multiple specifications, including 41×21 mm, 41×41 mm, 41×62 mm, and 41×82 mm. These structural brackets are extensively. The utility model discloses a briquetting structure for a photovoltaic bracket, which is applied to the photovoltaic field, and the technical scheme is as follows: briquetting mechanism includes circular briquetting down, goes up the briquetting, briquetting top fixedly connected with cylinder. Photovoltaic module briquetting casting is a special solar bracket accessory. 1,Patented products/processes, high precision and high efficiency, long service life of the mold. 2,Intelligent change, self-service tracking cut shear, shear precision ± 1 mm.

Photovoltaic bracket briquetting production integrated machine

Briquetting structure for photovoltaic bracket

The utility model relates to the technical field of photovoltaics, in particular to a briquetting structure for a photovoltaic bracket.
