

# Ping Solar Power Plant Introduction

## Overview

---

PING, the leading golf equipment manufacturer, has taken the next step towards sustainability by installing 655 solar panels on the roof of its headquarters in Gainsborough, UK. The installation was completed by Cactus Energy. A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale grid-connected photovoltaic power system (PV system) designed for the supply of merchant power. They are different from most building-mounted and other decentralized solar power because they. Club manufacturer Ping provides positive news from the equipment industry in terms of energy supply. With a total of 655 solar modules on the roofs of the company's buildings in. What is the progress made in solar power generation by PV technology?

**Highlights** This paper reviews the progress made in solar power generation by PV technology. Performance of solar PV array is strongly dependent on operating conditions. Cactus worked closely with PING to assess its energy needs and develop a solar panel system that would meet both the company's.
