

Portuguese Energy Storage Systems Company

Overview

StorSystems is driving the Portuguese energy transition by developing, building, and operating advanced battery storage systems. Battery storage allows power produced now to be stored for use later. It will be essential for a decarbonised and reliable energy network in Portugal. The projects involve the. When renewables supplied roughly 80% of Portugal's electricity in July 2025, prices in the wholesale market briefly slid below zero—great for generators selling excess electrons, confusing for consumers who still paid standard tariffs. This project marks Powin's. Installed in the southern Portuguese region of the Algarve, the 5MW/20MWh battery system enhances the site's ability to dispatch renewable energy to the grid when it needs it most and optimizes grid stability.
