

Power generation stations for mining

Overview

Standard practice is for mine site operators to seek convenient power purchase agreements (PPAs) with local utilities, but a trend is emerging towards miners investing in decentralised on-site power supply. GE Vernova Gas Power delivers power generation and distribution systems that can help meet the needs of mining operations for cost-effective, reliable, and readily available power. To optimise the power system's total cost and its impact on availability, different options taking into. Optimizing mine power by balancing CAPEX, OPEX and up time of electric power at every phase of a mine. When you design your facility within the.
