

# Preventive testing of photovoltaic energy storage batteries

## Overview

---

If you have a lead-acid battery system, you will need to check the electrolyte level and specific gravity monthly, and top off the batteries as needed. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at [www.nrel.gov](http://www.nrel.gov). National Renewable Energy Laboratory, Sandia National Laboratory, SunSpec Alliance, and the SunShot National Laboratory Multiyear Partnership (SuNLaMP) PV O&M Best Practices. NFPA is keeping pace with the surge in energy storage and solar technology by undertaking initiatives including training, standards development, and research so that various stakeholders can safely embrace renewable energy sources and respond if potential new hazards arise. Department of Energy (DOE) Federal Energy Management Program (FEMP) and others can employ to evaluate performance of deployed BESS or solar photovoltaic (PV) +BESS systems. A simple test can reveal how well your system is functioning and whether it's time for a replacement. However, the increased reliance on battery storage has also introduced.

## Preventive testing of photovoltaic energy storage batteries
