

Price of BC photovoltaic panels

Overview

On average, the cost of installing roof-mounted solar panels in BC is between \$2. This adds up to \$15,000-19,800 for a 6 kWp system. British Columbia's primary energy source is hydroelectricity, but the province is significantly expanding its solar energy capacity to meet the growing energy demand and to diversify its energy mix. Under CleanBC, the province aims to achieve net-zero emissions by 2050, and solar energy is expected. Let's break down this new way to go solar in British Columbia, look at the financing that makes it possible, and explain why the old government grants aren't the focus anymore. The Big Question: How Much Do Solar Panels Cost in BC?

First, let's talk about the cash price if you were to pay for it. The average BC household spends between \$100 and \$150 per month on electricity, and with the right system, solar panels can offset up to 100% of that cost. But the question remains:.
