

Price of installing photovoltaic panels on the ground

Overview

As of 2025, the installation cost for ground-mounted solar panels typically ranges from \$1.50 per watt, depending on factors such as project size, location, site conditions, and the type of mounting system used. Ground-mounted solar systems are free-standing structures that support solar panels. Cost per watt is an important metric in evaluating the value and efficiency of a solar installation project. However, if your area has any possible rebates or state incentives, it could be further reduced to \$0.37,660. Moreover, if you are planning to install a solar carport with these mounted solar. Ground mounted solar panels are solar arrays installed on frames anchored in the ground instead of your roof, letting you place panels at the best angle and direction for maximum power.
