Pricing for server racks with constant temperature and humidity

Modular design,
unlimited combinations in parallel

BUILT-IN DUAL FIRE PROTECTION MODULE

Overview

com offers a large selection of wholesale constant temperature server rack for mounting and storing your servers. These network cabinets are built to keep dust and contaminants away from hardware. For newer IT equipment, the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) recommends an operating temperature of 64°F to 81°F (18°C to 27°C), and a relative humidity (RH) of 60 percent. The Cisco Compatible logo signifies that Eaton's product has undergone. Modern data centers can house server racks generating 15-150 kW of heat each, requiring specialized cooling solutions that standard HVAC systems simply cannot handle. For professional settings, constant temperature server rack options need to be spacious. Maintaining the proper operating temperature for equipment in a network closet, server room or data center helps prevent thermal throttling, equipment damage and expensive downtime. This SmartRack® in-row precision air conditioning system is the ideal cooling option.
