

# Pure labor cost for photovoltaic panel installation

## Overview

---

High-labor-cost states like California have an average installation cost of \$3 – \$4 per watt. Additionally, solar tax incentives and rebates vary by state. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This guide provides a transparent, itemized breakdown of residential solar installation pricing expected in 2025. System size, panel type, and labor needs are the biggest cost drivers, along with your roof's condition and any upgrades. To put that in perspective, using the a modeled market price (MMP) of \$2.
