

Qingtuo Solar Power Generation

Overview

China's first offshore floating solar project in Qingdao generates 16.7 M kWh annually, using tidal-adaptive panels to boost efficiency through seawater cooling. China has launched a fully seawater-based solar energy system – the first of its kind suitable for industrial use and large-scale power production – as part of broader efforts to expand renewables in coastal regions, boost the maritime economy and drive industrial innovation. Covering an area of about 60,000 m². China and Singapore, 23 May 2024 - SP Group (SP) is partnering Qingdao Daneng Environmental Protection Equipment Co. ('Qingda Environment'), a leading local provider of environmental technology solutions, to invest and build a 90-Megawatt (MW) aquavoltaic farm. Will Shandong's first green hydrogen. China Petroleum & Chemical Corporation (Sinopec), together with Shandong Province and Qingdao Municipality, has commenced operations of China's first commercial floating offshore photovoltaic (PV) project in a full-seawater environment. Nevertheless, Sinopec has just.
